

GreenTek®

Trusted by the best in the game

**TRUSTED
BY THE BEST
IN THE GAME**

WELCOME TO THE NEW 2023 EDITION OF THE GREENTEK TURFCARE CATALOGUE

Helping you to overcome your turf maintenance challenges by providing innovative time and money saving equipment, has always been our focus.

It is very rewarding when **greenkeepers tell us how much money we are saving them** with equipment that works better, faster, wider, does more tasks at once, takes less time (and therefore also less fuel) or enables a **reduction in seed, wetting agent, or chemicals.**

To maximise your income, our attachments are designed to cause minimal disruption or disturbance to play, enabling year-round operation and ensuring you create top quality playing surfaces even during the peak season.

We have been at the forefront of turfcare innovations for over 50 years, and our latest range of turfcare equipment carries these principles forward. **Take a look at the new Mega-Mix fertiliser mixing station on page 6 which could save you hundreds or even thousands of pounds each year.** I think is one of our best innovations yet!

Passing the baton

After more than 53 years in the business I am now taking on the role of Chairman and my son-in-law Ian Ellis becomes Managing Director, taking forward the day to day running of GreenTek. Ian and the team will **continue our mission of bringing you innovative solutions to today's turfcare challenges.**

With very best wishes for 2023

David

David Michel
Founder & Chairman, GreenTek

Innovative equipment to make your budget go further

WHAT'S NEW

Mega-Mix (page 6)

Save hours of time and hundreds or even thousands of pounds by mixing your own feed.

Thatch-Away Micro-Groomer (page 12)

The new Micro-Groomer takes greens grooming to the next level with unmatched precision.

Machinery Finance (page 5)

Is it time to look differently at how you buy?
Discover different ways to fund the purchase of your GreenTek equipment.

OUR MONEY-BACK PROMISE

We guarantee that every GreenTek turf maintenance product will do exactly what our literature claims – otherwise we will collect it and refund your payment 100% in full, right up to 12 months after purchase!

5 Year Warranty

All GreenTek turfcare machinery is covered by a **FREE 5 Years Parts And Labour Warranty** for commercial use. Or a **FREE 3 Months Warranty** for hire use.

This is a genuine 'bumper to bumper' warranty and includes everything except components subject to fair wear and tear such as blades, brushes, belts, bearings, drive splines etc, and damage caused by corrosion, abuse or lack of maintenance. Outsourced components such as engines, motors, pumps or valves carry the original manufacturer's warranty.

TRUSTED BY THE BEST IN THE GAME

GreenTek is recognised throughout the UK and around the world for high quality, innovative turfcare equipment. From the lush green grass of parkland golf to the firmest heathland courses, coastal links and a variety of sports stadia, our reputation has been built over the last 50 years.

Still driven by the same family passion that started the horticultural engineering business in 1969, GreenTek continues to innovate and provide solutions that are now established as **essential tools by the best in the game.**

It's no coincidence that **88 of the UK's top 100 golf courses** (based on Golf Monthly 2021 Top 100 list) have at least one piece of GreenTek equipment in their shed. Many of which have been using GreenTek for many, many years.

But GreenTek isn't just for the few, it's for every turfcare professional who wants to keep their playing

surfaces in top condition as well as using their time and resources wisely.

GreenTek users know they can:

- trust our equipment
- trust our team
- trust our support

All backed by our Gold Star 5 year warranty and unique 12 month money-back guarantee.

Proven solutions for today's turfcare challenges are available today from stock. Speak to a member of the GreenTek team or contact your local dealer to discover for yourself why we are trusted by the best in the game.

IS IT TIME TO LOOK DIFFERENTLY AT HOW YOU BUY?

As you consider what machinery would be beneficial in your work, you may be looking at how best to fund the purchase of that equipment.

If you have the money available then it may be possible to pay for machinery upfront, but this is not always the case. An existing machine could require replacing unexpectedly or maybe you are looking to fund your purchases differently.

There are a variety of machinery finance options and a range of finance providers and financial institutions who can help you buy the machinery you need.

What types of machinery finance are available?

There are numerous ways that machinery purchases can be funded. One of the most popular is asset finance, which allows the cost of equipment to be paid in monthly instalments.

Asset finance can take various forms and a detailed discussion with a finance broker or lender, and your organisation's financial advisers will help you choose the right option.

Some of the options that are available include:

- hire purchase agreements
- finance lease agreements
- operating lease agreement.

They will discuss in detail how each works, so that you can decide the best way for your organisation. They will also show you the cost of financing your purchase over a number of months.

Each finance provider will have different criteria for lending and so the options available to you will be dependent on the information provided by your organisation.

MEGA-MIX

NEW

FAST, ECONOMICAL WAY TO MIX YOUR OWN FEED

MEGA-MIX

With the rising cost of liquid concentrate, mixing your own feed from soluble straights can be up to 90% cheaper. But the traditional way of doing this is time consuming and messy, and risks blocking your sprayer jets if not thoroughly mixed.

The brand new Mega-Mix fertiliser and chemical mixing station from GreenTek provides a fast, economical way for greenkeepers to mix their own feed.

Mega-Mix enables soluble straights of NPK, Sulphate of Iron, Sulphate of Ammonia etc to be thoroughly mixed without hot water and avoids any messy straining and additional dilution.

Instead you can thoroughly mix up to 1,200 litres in the tank, using only cold water. The high capacity pump transfers the solution through the filter unit and into your sprayer in just minutes. Then the next load can be mixing whilst you are out spraying the first.

Save hours of messy work and hundreds or even thousands of pounds per year by mixing your own solutions with Mega-Mix.

Fills and mixes unattended with auto shut-off filler hose

- Save up to 90% compared with using liquid concentrate
- Save time by spraying whilst the next load mixes
- Minimises sprayer blockages and pump wear with fully dissolved granules
- Safely add chemicals with integral fold-out step
- Inline filter unit prevents nozzle blockages

5hp Honda engine with high capacity pump

High volume hose with integral filter unit to prevent blocked nozzles

THATCH-AWAY

THE WORLD'S NO.1 GREENS CARE SYSTEM

THATCH-AWAY

Keeping your greens in top condition needs your knowledge and expertise, but it also needs the right tools.

Thatch-Away Supa-System is the original revolutionary turf maintenance system for greens triplexes, trusted by the best greenkeepers in the world for creating perfect playing surfaces and maintaining firm, fast and smooth greens.

Turn your triplex into a total greens maintenance tool in minutes. With a choice of 13 different cassettes to verticut, scarify, groom or slit, brush, roll and spike, you have the perfect system for your greens.

The performance of the tungsten tipped verticutters is unrivalled. Nothing matches Thatch-Away's ability to surgically remove and collect up thatch, leaving a beautifully groomed and immediately playable surface.

With precision height adjustment in 0.25mm increments, you control the intensity of each operation, allowing you to use your Thatch-Aways through-out the year.

Wherever you are in the world, Thatch-Away is effective on every sward composition whether you have a links, parkland, heathland or desert course.

Thatch-Away – does exactly what it says!

Trusted by the best in the game

CASSETTES FOR EVERY TASK

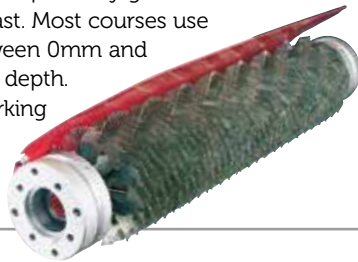

Verticutter

For a thatch-free surface

With their revolutionary FanForce tungsten-tipped blades spaced at just 10mm apart, the Verticutter Cassettes will remove and vacuum up an incredible amount of thatch. They leave an impeccably groomed surface which is smooth and fast. Most courses use them set between 0mm and 3mm working depth.

Maximum working depth is 6mm.

Micro-Groomer

For an ultimately groomed surface

Combining extra thin 11 tip blades with ultra close 6.5mm spacings the Micro-Groomers effectively enable you to double-verticut in a single pass. Typically set at 1 or 2mm they provide the ultimate grooming for refining the leaf texture of your greens.

Groomer/Poa Buster

For a smooth textured surface

To thin out and refine coarser grasses, particularly Poa Annua, the Groomer/Poa Buster Cassettes have especially thin blades with offset tungsten tips that cut at just 5mm spacings. Used at 0mm to 2mm working depth they encourage fine textured turf.

Fine-Grass

For fine fescue and bent

The Fine-Grass cassette has ultra-thin, 1mm, tungsten-tipped blades at 15mm wide spacings. Specially designed for preventing thatch from building up in fine fescue and bent grasses. Typical working depth 1mm to 2mm, maximum depth 6mm.

Scarifier

For a thatch-free root zone

Periodic use of the Scarifier Cassettes set at 8mm to 12mm deep will remove and sweep up enormous volumes of thatch from deep within your root zone, enabling air and topdressing to enter, and promoting microbial action that will further break down the thatch layer.

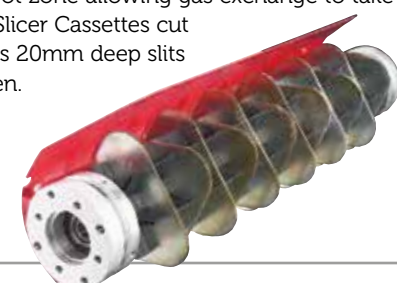

Deep Slicer

For vigorous roots and growth

To prune the grass roots, stimulating vigorous new growth, and to enable air to penetrate even deeper into the root zone allowing gas exchange to take place, the Deep Slicer Cassettes cut continuous 20mm deep slits in the green.

Build your own greens care system with a choice of 13 cassettes including the latest addition of Micro-Groomer, see page 12 for full details.

Star Slitter

For an aerated root zone

The Star Slitter Cassettes mounted on your greens triple mower provide a fast way of aerating to a depth of approximately 20mm. The surface is left undisturbed, and play can immediately continue.

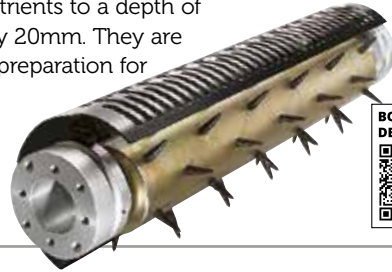

Sarel Roller

For a surface that breathes

To keep your turf growing strongly in summer or drought periods when the surface tends to get sealed over, the Sarel Roller Cassettes allow entry for irrigation water and nutrients to a depth of approximately 20mm. They are also an ideal preparation for over-seeding.

Greens Roller

For faster smoother greens

A regular light rolling of your greens enables you to maintain a smooth, fast surface without mowing so close. These solid steel roller cassettes fit straight into the Thatch-Away units, providing you with a highly effective greens roller for minimum expense.

Rotary Brushes

For a gently brushed surface

The soft black rotary brush cassettes are ideal for removing dew, wormcasts and light debris throughout the year. The stiffer blue version will collect the coarser residues left after deep scarifying, coring and brushing in top dressing.

Bermuda Tamer

Keep bermuda healthy

Keeping bermuda grass healthy and manicured is a challenge, but the Bermuda Tamer Cassette provides an unbelievably powerful way of keeping this aggressive grass under control. Thousands of high tensile steel bristles give a superbly groomed surface and a smooth, true ball roll.

Top Dressing Brush

For evenly dispersed top dressing

The Top Dressing Brush Cassettes follow the contours of your greens to evenly brush-in your top dressing, without scraping it off the crowns and dumping it in the hollows like a drag mat does. They are also ideal for standing up the grass for an extra clean cut and a faster ball roll.

MICRO-GROOMER

NEW

ASK FOR
A DEMO

Over 2,000 blade tips give unmatched precision grooming

“Now we can cut at 6.5mm spacings in a single pass, the job gets done in half the time”

“Surfaces are much smoother and truer. Micro-Groomer is a really efficient, low disruption tool”

Fits all popular greens mowers

- Over 2,000 blade tips give unmatched precision grooming
- Double-verticut in a single pass and halve your fuel and labour costs
- Vacuum technology delivers unrivalled cutting collection
- Smoother, leaner and faster putting surfaces
- Typical 20 year lifespan gives vastly lower cost than groomers on mowing units
- Fitted in seconds to your triplex

THE ULTIMATE IN SWORD REFINEMENT FOR SMOOTHER, FASTER GREENS

Looking for the next level of refinement in your greens to create even faster and truer putting surfaces?

You need Thatch-Away Micro-Groomers, the latest addition to the world's No.1 greens care system.

Micro-grooming is the ultimate in sward refinement, there's nothing else like it.

Laser-engineered blades with over 2,000 extra fine tungsten tips work in the upper leaf area. Spaced at just 6.5mm apart, they deliver approximately 39,000 surgically precise micro-cuts per square metre.

They effectively enable you to do a double-verticut in a single pass, halving your fuel and labour cost.

Set-by-Feel micro-adjusters offer precision control to accurately adjust cutting height by 0.25mm.

It's no surprise Micro-Groomers have been used on some of the best courses in the world.

It's time to take your greens to the next level with the latest turf improvement technology!

THATCH-AWAY WALK BEHIND

HIGHEST PERFORMANCE PEDESTRIAN VERTICUTTER

THATCH-AWAY
WALK BEHIND

**ASK FOR
A DEMO**

Golf greens, bowls greens, and croquet lawns need a totally clean finish for green trueness and a smooth ball roll.

Nothing comes close to the Thatch-Away Walk Behind verticutters. Available in 24" and 30" cutting widths, the Walk-Behind has been designed to give you the highest performance available in pedestrian verticutters.

The unique Fan-Force Tungsten tipped blades combined with the Thatch-Away's extra-long grass deflector create a powerful air vortex which literally sucks up thatch and blasts it into the grass box, leaving a debris-free surface.

The precision manufactured rear roller, and the rear roller scraper incorporating a special trough to collect the debris it removes, are features that set the Thatch-Away apart from other machines.

An inter-changeable rotary brush reel is also available for when you wish to give the surface a gentle grooming, or remove surface debris and Poa Annua seeds.

Rear roller scraper trough collects debris as you go.

Tungsten tipped blades and finned spacers for ultimate cutting and collection performance.

- The ultimate verticutting experience on golf and bowls greens and fine lawns
- 605 tungsten tip blades leave a totally clean finish
- Unique Fan-Force blade design literally sucks thatch out of the turf
- Large collection box saves time emptying clippings
- Increases ball roll and green trueness

DYNA-SEEDER

FAST AND PRECISE OVERSEEDING FOR EFFECTIVE GERMINATION

DYNA-SEEDER

**ASK FOR
A DEMO**

Dense, healthy greens are every greenkeeper's dream. But promoting fresh new growth can be challenging, if your greens are filling up with *Poa Annua* and your members object to the disruption of overseeding during the summer season.

The revolutionary Dyna-Seeders provide you with a unique opportunity to quickly and effectively sow your desired grass species with precision and speed.

Their vibra-spiking mechanism creates thousands of clean open holes or 'plant pots' for the seed to lodge and germinate in. Seed is precisely metered out onto the green at the most economical application rate and then pushed into the holes by the rotating spikes.

Consistent seed distribution reduces seed wastage enabling you to sow pure bent seed as low as 5g per metre, accurately and without wind drift.

With the Dyna -Seeders the whole seeding operation on 18 greens can now be done in hours at any time throughout the season.

Vibrating spikes create 1,200 holes per square meter for consistent seed distribution.

Seed is precisely metered out at the most economical application rate and pushed into the holes by the rotating spikes.

- Accurate seed metering without wind drift gives even growth and reduces wastage
- Seed is brushed into holes to maximise germination
- Overseed 18 greens in just a few hours, no need to close any greens
- Discrete overseeding leaving instantly playable surfaces
- Fitted to your triplex in minutes

"The difference we see is amazing. We can now seed more, and it gives a great take-up. Seed is easy to measure, there is no waste. I don't need to do anything afterwards - no rolling - the seed just goes straight in the hole. This saves me a lot of time.

I would absolutely recommend the Dyna-Seeder to anyone."

DYNA-CORER

FAST AND DISCRETE MICRO-CORING FOR YEAR-ROUND AERATION

DYNA-CORER

**ASK FOR
A DEMO**

Aeration is vital for healthy turf; reducing compaction and allowing air, water and nutrients to reach the root zone. However, hollow coring can be slow and labour intensive; it disrupts play and disturbs the playing surface.

The innovative Dyna-Corers enable you to aerate your greens throughout the season with their micro-coring process.

The micro tines of the Dyna-Corers remove thousands of tiny core plugs, producing small neat holes, closely spaced for minimal disturbance to the playing surface.

Coring depth can be precisely adjusted down to a maximum of 25mm. A range of interchangeable tine options include cross tines for decompacting hard areas, needle tines, and slitting blades.

Quickly fitted to your triplex, the Dyna-Corers have a working width of 1.5 metres. Their rapid action enables you to micro-core a green in minutes, minimising disruption to play.

The integral core-scraper effectively sweeps the plugs to the edge of the green for removal. Then just a quick blow or brush and your green is ready for play.

Micro tines effectively remove thousands of tiny core plugs

Interchangeable tine options:
Hollow: 11mm or 9.5mm.
Solid: 5mm or 9.5mm.
Cross for de-compacting hard areas.
Slitting blades for continuous or interrupted slits

- Minimal surface disturbance – no disruption to play
- Working width of 1.5 meters to micro-core a whole course in just a few hours
- Coring depth can be precisely adjusted down to 25mm
- Prevents surface sealing to enable air and water to reach the root zone
- Regularly remove thatch all year round, even in dry weather
- Quickly attach to your triplex for discrete coring

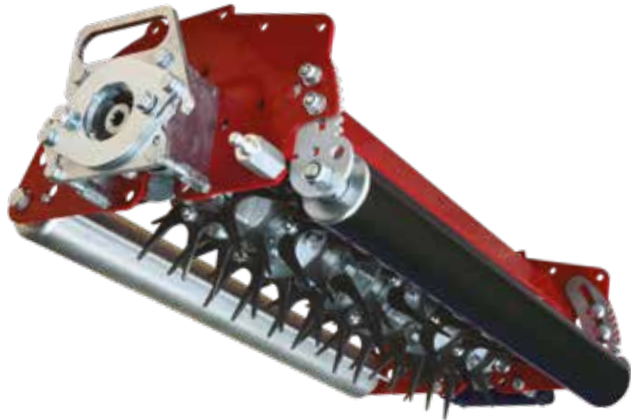

“One of those pieces of equipment that comes available every few years and is “Wow!” and it changes the way you maintain your greens.”

DYNA-SPIKER

ASK FOR
A DEMO

Can be fitted with spiking blades or slicing blades which give a continuous slit

“Nothing else penetrates as deep without using a tractor mounted implement.”

The Dyna-Spiker produces neat deep slits and an undisturbed surface

- Penetrates when even sarel rollers can struggle to work
- Use year round and leave immediately playable surfaces
- 1.5 metre working width allows superior aeration of greens and tees in only a few hours
- Control the depth of spike down to 35mm
- Fitted to your triplex in minutes
- Star spike or slice to get the aeration you want

POWER SPIKING TO RELIEVE COMPACTED SURFACES

When golf greens become hard in summer drought conditions, even sarel rollers struggle to penetrate deep enough to enable air, water, and wetting agents to penetrate the root zone.

Dyna-Spikers are the solution. Using a powered, vibratory action, their spiking or slicing blades are driven through even the hardest surfaces and deep into the root zone.

Adjustable to a maximum depth of 35mm and fitted to your triplex in minutes, the 1.5 metre working width means you can get superior aeration across all your greens and tees in only a few hours.

That's fast and effective aeration and the minimum of disruption to playing surfaces. No need to close the greens, and surfaces are immediately playable.

PERFECTLY CLEAN GREENS IN MINIMUM TIME

DYNA-BRUSH

**ASK FOR
A DEMO**

When you want to disperse worm-casts and collect other loose debris from greens, tees, surrounds and approaches, Dyna-Brushes are in a league of their own.

The reverse-drive gearbox rotates the brushes the opposite way to the direction of travel, effectively flicking-up aeration cores, as well as stubborn debris like leaves or pine needles, collecting them all in the dedicated collection boxes.

The contra-rotating brushing action also stands the sward up before mowing to give a much cleaner cut.

Fitted in minutes to your triplex, the three Dyna-Brush units cover a width of 1.5 metres which means you can brush at the same speed as you would mow, covering a green in minutes and the whole course in a few hours.

Dyna-Brushes deliver a whole new level of finesse to your greens presentation.

Contra-rotating brush units flick up aeration cores

Attach to your triplex in minutes

- Excellent for greens, tees surrounds and approaches
- Sweeps up mini-cores and stubborn debris like leaves and pine needles, leaving an immediately playable surface
- Contra-rotating action stands up the grass sward for a cleaner cut when mowing
- Fitted to your triplex in minutes

“Very impressed with the Dyna Brush - it worked wonders, standing up the grass and cleaning out the sward.”

“They collected the Dyna-Corer’s cores, even though they were very wet - amazing!”

SELECT-A-VIBE

FOR CONSISTENTLY FAST GREENS

SELECT-A-VIBE

**ASK FOR
A DEMO**

Attached to your greens mower, Select-A-Vibe Rollers produce measurably smoother and faster greens than other types of rollers.

The three 22" Select-A-Vibe units follow your greens' contours and leave straight full-width stripes, just like your mower does. Their 1.5m (5') rolling width enables you to roll greens faster than other rollers.

You can also use the vibratory action of the rollers to vibrate-in topdressing. By getting the topdressing further down into the surface, you stop it blunting your mower's blades and can dramatically reduce downtime and regrinding costs.

Do all your greens stimp at the same speed? They can now with the Select-A-Vibe rollers. By varying your speed of travel when rolling you can vary the vibrations per metre that you apply to each green, helping to even out inconsistencies between different greens.

Easily adjustable vibration power levels

Chose the optimum setting to suit your task:

- 1 Establishing new greens
- 2 Regular rolling
- 3 Pre-competition rolling
- 4 Trueing up after aeration
- 5 Vibrating-in topdressing

- With 5 vibration power levels you can find the optimum settings to suit your greens conditions
- Roll straight stripes that match your mowing width
- Quick to use and to transport from green to green
- Vibrate-in topdressing without bridging over coring holes
- 5 vibration power levels for multiple tasks
- Fits both electric and hydraulic drive greens mowers

MAXI-BRUSH

BRUSH YOUR WAY TO HEALTHY TURF

MAXI-BRUSH

ASK FOR A DEMO

Brushing turf is the best way of working-in topdressing, removing worm-casts and dispersing dew to help prevent fungal diseases such as fusarium.

The Maxi-Brush is a triple section 5.4m (18') wide brush, which also quickly adapts to a six row 1.8m (6') wide topdressing brush.

This versatile brush comes with manual folding for general sports field use. For golf courses, the optional hydraulic folding provides ultimate ease and efficiency for transport between fairways.

With a working width of 5.4 metres, it is possible to brush a whole golf course or multiple sports pitches on a daily basis to remove worm-casts and dew before play commences. You can also use the Maxi-Brush before mowing to disperse dew for a clean cut with no grass clumps.

An economical and versatile piece of equipment, you can also add the Sarel-Roller and Rear Brush Cassette into the same Maxi-Brush frame, for effective greens aeration and dew brushing in a single pass.

Can be used with lightweight compact tractors, or with utility vehicles by using the Multi-Mount adaptor frame.

Hydraulic Maxi-Brush folds up without leaving your seat.

Quickly adapts into a six row topdressing brush.

Sarel-Roller Cassette with Rear Dew Brush fits into an existing Maxi-Brush frame.

- Removes worm-casts and disperses dew to help prevent fusarium
- 5.4m working width for rapid daily brushing
- Six 1.8m brushes for topdressing
- Easy and quick to use and transport
- Also suitable for maintaining synthetic turf
- Can be used with compact tractors or utility vehicles

Maxi-Brush			
	Working width	Transport width	Weight
Triple brush with manual folding	5.4m (18')	1.8m (6')	150kg
Triple brush with hydraulic folding kit	5.4m (18')	2.34 (7' 8")	180kg
Sarel Roller kit fitted to main frame	1.5m (5')	1.8m (6')	135kg
Rear Dew Brush kit	1.8m (6')	1.8m (6')	8kg

"We can brush all our fairways in 2 hours 45 minutes which allows clump free cutting."

SAREL-ROLLER AND BRUSH

ASK FOR
A DEMO

Sarel-Roller with optional Dew Brush

Fits to compact tractors and utility vehicles

- Quickly and effortlessly creates thousands of small holes
- Immediate brushing disperses moisture, reducing risk of fusarium
- Working width of 1.5m to irrigate all your greens in just a few hours
- Reduces the need for wetting agents
- Use before and after overseeding to increase germination rate
- Attaches to compact tractors and utility vehicles for ease of use

THE EFFECTIVE SOLUTION FOR SEALED TURF

The combination of dry summer weather, dust and foot traffic can cause turf surfaces to seal over, preventing water and essential nutrients from being absorbed into the root zone, and causing puddles after heavy rainfall.

Sarel-Rolling followed by immediate brushing is your solution to survive droughts and downpours.

The Sarel-Roller spikes the surface with thousands of small holes. The brush then sweeps the dew down the holes into the root zone to conserve moisture in dry periods. And when it rains, you will have an open surface that drains freely.

The Sarel Roller and Brush combination aids effective irrigation, and can help to significantly reduce your expenditure on wetting agents.

Economical and versatile, the Sarel-Roller and Brush is ideal for use before and after overseeding to increase the germination rate. Plus you can also fit the Maxi-Brush brushes onto the same Sarel-Roller frame for daily brushing to remove worm-casts and disperse dew.

Attaches to compact tractors, or use the Multi-Mount adaptor frame to quickly attach to your utility vehicle.

EASY TURF MAINTENANCE WITH YOUR TRUCK

MULTI-MOUNT

ASK FOR A DEMO

By using the Multi-Mount adaptor frame, you increase your power unit options for GreenTek attachments to include utility vehicles.

The Multi-Mount is a universal frame which can be configured to fit all popular utility trucks.

Suitable for the Toro Workman, John Deere Pro Gator and Cushman Truckster, Multi-Mount enables you to attach the Aero-Quick, Maxi-Brush and Sarel-Roller to any of these power units.

Quick and easy attachment

Aero-Quick and Multi-Mount on a Toro Workman.

- Fits all popular utility vehicles
- Quickly and easily change attachments
- Durable heavy-duty construction
- The same frame can be reconfigured in future to suit different utility vehicles

Sarel-Roller and Multi-Mount on a John Deere Pro Gator.

FAST, EFFICIENT BRUSHING

MULTI-BRUSH

**ASK FOR
A DEMO**

Brushing turf is the most effective way to remove worm-casts, disperse dew and work-in topdressing.

With the Multi-Brush you can brush all the fairways on an 18 hole golf course in two hours thanks to its massive 5.4m (18') working width.

The three independently floating heads with unique double-jointed lift arms enable the Multi-Brush to flow over undulations like nothing else can.

An additional benefit of brushing is that you can follow straight over with your fairway mower, leaving an evenly dispersed cut without clumps of wet clippings everywhere.

Plus, at the touch of a lever, the Multi-Brush effortlessly transforms itself into a supremely effective 1.8m topdressing brush.

Hydraulic folding arms

Supremely effective for brushing-in topdressing

Multi-Brush		
Working width	Transport width	Weight
5.4m (18') or 1.8m (6')	2.1m (7')	240kg

- Massive 5.4m (18') working width for efficient brushing
- Three independently floating heads follow contours
- Hydraulic folding for ease of transportation between fairways
- Rapid dew removal for clump free mowing
- Versatile brush can be used to work-in topdressing

"It used take me half a day to do half of my fairways with a drag mat. Now I can do all of them in half a day with Multi-Brush, it's the most used tool in the shed - 100% recommended!"

MULTI-ROLLER

ASK FOR
A DEMO

The three rollers can be used in-line for intensive rolling

- Three separate rollers follow undulations
- Hydraulic folding for quick and easy operation
- Fits to mid-size compact tractors
- Quickly restores the surface of your pitches
- 5.4m working width to roll a full pitch in approximately 20 minutes
- Quickly restore the surface between games

QUICKLY RESTORE PLAYING SURFACES

The Multi-Roller has been designed for large areas of turf that require regular light rolling.

Specially developed to meet the needs of football academies and sports complexes with multiple pitches, to restore the surface between games. It is also ideal for rolling golf fairways.

The massive 18' (5.4m) working width makes it possible to roll a full pitch in approximately 20 minutes.

Multi-Roller's three separate rollers follow undulations for effective rolling. And the hydraulic folding arms enable easy transportation between pitches.

Lightweight at only 650kg, the Multi-Roller can be attached to a mid-range tractor for rapid rolling. The secret of its effectiveness is that the small diameter rollers give a greater rolling pressure for their weight than large rollers.

Multi-Roller		
Working width	Transport width	Weight
5.4m (18') or 1.8m (6')	2.5m (8'2")	650kg

THE WORLD'S WIDEST SAREL ROLLER

Sarel rolling is recognised as a highly beneficial turf treatment. It keeps the turf surface open so that it can breathe and drain, and nutrients can be absorbed.

Thanks to its large 5.4m working width you can do regular surface aeration quickly and efficiently with the Multi-Sarel.

By spiking thousands of small holes up to 30mm deep, the Multi-Sarel quickly creates well-drained and freshly aerated turf. Preventing surface sealing in one pass, and even over undulating ground.

The Multi-Sarel has three separate units which fold out hydraulically to give a massive 5.4m working width. It can also be used folded in with all three rollers in line. These give an intensive spiking pattern of aeration, and provide the ideal preparation for overseeding.

Rear brush attachments are also available so that you can spike and groom at the same time, leaving your pitches healthy and immaculately striped.

Multi-Sarel

Working width	Transport width	Weight
5.4m (18') or 1.8m (6')	2.3m (7'6")	450kg

ASK FOR A DEMO

MULTI-SAREL

- Keep your turf breathing and draining to reduce the risk of fusarium
- 5.4m working width for rapid coverage of large areas
- Used folded in for intensive overseeding preparation
- Optional rear brushes groom your turf while you spike.

Units can also be used folded in for intensive overseeding preparation

Optional rear brushes groom your turf while you spike

TURF CONDITIONER

ECONOMICAL DETHATCHING FOR HEALTHY TURF

TURF CONDITIONER

ASK FOR A DEMO

Raking helps stimulate healthy grass growth, removes thatch, and lifts the grass up before mowing to prevent nap. The Turf Conditioner is a highly effective way to rake your turf. It has three adjustable rows of spring tines, each of which can be individually adjusted to achieve the exact degree of raking required.

With the adjustable stiff rear brush you can groom the surface of your turf to leave a beautifully striped finish at the same time.

Available in two sizes, Turf Conditioner 6 offers a 1.8m working width, whilst Turf Conditioner 12 has a generous 3.6m working width enabling you to save time covering your fairways or pitches.

Turf Conditioner 12 with folding wings

3 rows of adjustable rakes and rear brush

Turf Conditioner 6	
Working width	1.8m (6')
Weight	50kg

Turf Conditioner 12	
Working width	3.6m (12')
Weight	155kg

- Available in 1.8m or 3.6m working widths
- Three adjustable rakes lift out thatch and debris
- Adjustable rear brush leaves a beautifully groomed and striped finish
- Enables air to circulate around the grass better, reducing the risk of fungal disease
- Fits to any tractor, or to utility vehicles with the Multi-Mount frame

Turf Conditioner 6

GREENS-GROOMER

UNRIVALLED TOPDRESSING PERFORMANCE

GREENS-GROOMER

ASK FOR
A DEMO

The Greens-Groomer, with its quadruple zig-zag brush pattern gives unrivalled sand dispersion and topdressing performance. Instead of throwing the sand forward to the edge of the green like a rotary brush does, the Greens-Groomer's 16 brushes work the topdressing right down to the base of the sward, and into your coring holes.

The Greens-Groomer therefore avoids leaving tramlines, takes less passes, and saves bruising the turf.

The Greens-Groomer 6 has a 1.8m working width, whilst the 3.6m Greens-Groomer 12 doubles your productivity in one go. The extra wings float to follow the contours of your greens, enabling you to quickly brush in topdressing or disperse dew over a full 12' working width, however undulating your greens or fairways are.

Plus the electric-lift system automatically lowers the wheels and raises the wings for easy transportation without getting off and doing it manually. If you already have the Greens Groomer 6, ask about our upgrade kit to turn it into a Greens Groomer 12.

Easy to use with any power unit, the Greens-Groomer can be towed or tractor mounted.

Brushes sand down coring holes

Full 12' (3.6m) working width with automatic folding wings.

- Effective topdressing without scuffing, bruising the turf, or leaving tram lines
- 6' to 12' upgrade kit available, twice as wide - takes half the time!
- 16 brushes work the topdressing down into the coring holes
- Available with electric wheel lift or 3pt mounted for compact tractors
- Auto lift folds brushes for easy transportation
- Soft or firm brushes available to suit different job applications

"16 separate brushes give unrivalled brushing-in and grooming"

SYNTHETIC-GROOMER

MOST EFFECTIVE BRUSH FOR SYNTHETIC TURF

SYNTHETIC-GROOMER

**ASK FOR
A DEMO**

Just as the original Greens-Groomer has long been recognised as the most effective brush ever made for natural turf, Greens-Groomer Synthetic is the equivalent for synthetic surfaces.

The unique patented brush pattern with 16 brushes positioned in a quadruple zig-zag formation prevents tramlines being left on the turf surface.

The rear mounted rake and brush attachment levels out the rubber crumb fill on synthetic pitches. 84 spring fingers mounted in three staggered rows decompact the rubber crumb and lift the grass fibres upright for a groomed playing surface.

Each row of rakes is adjustable, so you can vary their intensity from a gentle combing to a thorough raking.

The Greens-Groomer Synthetic is the most superbly effective tool for maintaining 3G synthetic pitches. A synthetic pitch is a big investment, so it pays to use the best equipment available to prolong its life.

Available in 6' and 12' widths

- Unique brush pattern prevents tramlines being left on the turf surface
- 1.8m (6') and 3.6m (12') working widths for grooming large pitches faster
- Adjustable rear rake and brush for rubber crumb filled pitches
- 84 spring fingers lift the grass fibres upright for a totally groomed playing surface

AERO-QUICK

EFFECTIVE AERATION FOR COMPACTED TURF

AERO-QUICK

ASK FOR A DEMO

Healthy turf needs air, so the compaction caused by regular play needs relieving with regular aeration. The Aero-Quick 1.5m aerator opens up the soil's structure and allows the turf to breathe and drain freely.

With a wide range of interchangeable attachments and a variety of slitting tines of varying depths, you can choose the right tools for maximum effectiveness on different types of sports turf from golf greens to football pitches.

The built-in weight tray allows you to add further ballast for maximum penetration. And the rear roller with rake and brush attachments enables you to carry out four operations in one go. Slit, roll, rake and brush all at the same time to create a perfectly groomed and striped finish in a single pass.

The Aero-Quick's full 1.5m (5') working width covers the tracks of most tractors up to 35hp. The versatile Aero-Quick weighs only 240kg, making it light enough to use on a compact tractor or utility vehicle fitted with the Multi-Mount adaptor frame.

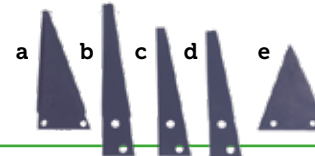

Wide range of interchangeable attachments

Slit Tinners

A range of slitting depths from 5" to 8 1/2" for maximum effectiveness on all types of sports turf.

- a: 8 1/2" Outfield
- b: 8" Outfield
- c: 6" Outfield
- d: 6" Fine Turf
- e: 5" Fine Turf

Hollow Corer

Removes plugs of soil, enabling the ground to expand and decompact. Also creates air channels to assist in the breaking down of thatch.

Disc Slitter

Continuous slits give maximum air and water absorption, and prune the grass roots to stimulate vigorous new growth.

Rear Roller, Rake and Brush

Use as separate attachments or all together to carry out multiple tasks at once.

Hinged rear guard for easy access to changeover attachments

- Wide range of slitting tines for maximum effectiveness
- Slit, roll, rake and brush in one go to save time
- Full 1.5m working width covers the tracks of most tractors up to 35hp
- Relieves compaction and opens up soil structure to allow the turf to breathe and drain
- Fits to compact tractors and popular utility vehicles

DOUBLE-QUICK

AERATE, ROLL, RAKE & BRUSH IN ONE GO

DOUBLE-QUICK

**ASK FOR
A DEMO**

It takes a lot of time and effort to keep sports turf healthy. Aerating, rolling, raking and brushing are all necessary to nurture and groom your turf.

The Double-Quick all-in-one system enables you to carry out all 4 vital tasks in one pass. The ultimate aeration system for playing fields, sports pitches, and fairways.

The heart of the system is the unique Main Frame, which carries two attachments of your choice, mounted one above the other. Change from Deep Slitter to Ballast Roller for example by just turning the Main Frame over and re-attaching to your tractor.

And thanks to the Double-Quick's all-in-one Rear Roller, Rake, and Brush attachment you can do all four operations every time you aerate with just one tractor and one operator.

Mix and match your attachments to suit your needs with a choice of slitters and corers for effective aeration, rollers for a smooth surface, rake for better air circulation and brush to leave a professional stripe finish.

Mix and match your attachments to suit your needs

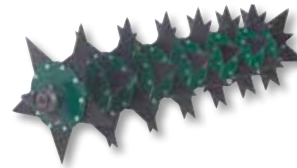

Deep Slitter

Closely spaced 8½" tines give a dense pattern of aeration for heavily used winter games pitches and fairways.

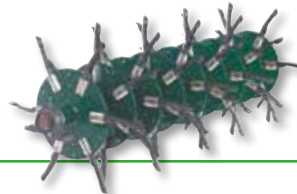

Fine Slitter

Even closer spaced 5" tines to prevent surface sealing and increase the absorption of air, water and fertiliser.

Hollow Corer

Removes plugs of soil, letting the ground expand and decompact.

Disc Slitter

Continuous slits give maximum air and water absorption and prune the grass roots to stimulate vigorous new growth.

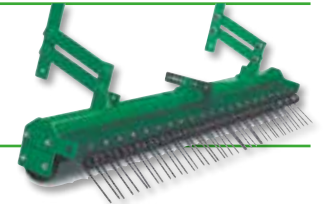

Ballast Roller

Fill with water for maximum effectiveness or use empty for a light rolling.

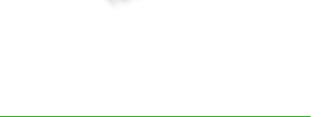

Rear Roller

For firming back divots after slitting.

Scarifying Rake

Attach to the Rear Roller for fast effective thatch control as you go.

Rear Brush

Attach to the Rear Roller to leave a well groomed appearance.

DOUBLE-QUICK

**ASK FOR
A DEMO**

It's a Rollover !

The heart of the system is the unique Main Frame, which can carry two attachments of your choice, mounted one above the other. So you can change from Deep Slitter to Ballast Roller etc by just turning the Main Frame over.

1 Remove pins holding top guard and rear attachment.

2 Attach tow cable to tractor and Double-Quick.

3 Drive tractor forward to roll Double-Quick over.

4 Re-attach to tractor and replace top guard.

- Effective aeration for heavily used winter games pitches and fairways
- Stimulates deeper roots which resist drought in summer
- Four operations in one go with no extra manpower
- Double mounted attachments to save time changing over in the field
- Exclusive design to GreenTek

Double-Quick

	Weight 6ft	Weight 8ft
Main Frame	200kg	290kg
Deep Slitter	122kg	160kg
Fine Slitter	129kg	170kg
Disc Slitter	38kg	50kg
Hollow Corer	120kg	170kg
Ballast Roller	180kg	200kg
(Weight of water ballast)	220kg	290kg

THE ULTIMATE WAY TO TRANSPORT GROUND CARE EQUIPMENT

LOW LOADING TRAILER

Safe transportation of equipment between greens or to and from sports fields is essential.

The Low Loading Trailer offers you an ideal means for transporting all types of groundcare equipment and supplies.

The drop-down tailgate provides easy loading access for a variety of small machinery.

Besides transporting mowers, these trailers can be used for tasks as diverse as carrying divot mix or collecting leaves.

A range of useful accessories is also available, including a 1" rubber mat, a sliding divider and a mower clamp for extra security during transportation.

- Versatile trailer system for all groundcare equipment
- Superior fully-welded construction
- Hot dip galvanized for maximum durability
- Drive-in tailgate ramp suitable for all kinds of small machinery
- Load capacity 400kg and 600kg

Standard Low Loading Trailer	
Body dimensions	152 x 99 x 43cm
Overall width	162cm
Load capacity	400kg
Super Low Loading Trailer	
Body dimensions	200 x 122 x 43cm
Overall width	184cm
Load capacity	600kg

Optional 1 inch thick Rubber Floor Mat.

EASY-LOAD

SPEED UP TOPDRESSING

Greenkeepers who own the Easy-Load topdressing trailer tell us that they can now topdress "twice as fast, with half the manpower".

With the Easy-Load you can transport your sand and load it directly into your topdresser without any manual handling. The massive 16" flotation tyres are spaced outside of the body which gives extra stability when you are tipping in the high position.

The Easy-Load is designed to be your ideal all-round three tonne trailer. It is equipped as standard with a dual-purpose tailgate that incorporates a loading chute, and is also top-hinged in the conventional way to enable you to use the Easy-Load for general tipping trailer duties as well as loading your topdresser.

The Easy-Load gives you maximum value from your investment, freeing up staff and eliminating manual handling.

WATCH THE
VIDEO 

Easy-Load	
Unladen weight	850kg
Load capacity	3 Tonnes
Body volume	1.83 cubic metres (65 cubic feet)
Body dimensions	2.47m (97") x 1.40m (55") x 0.53m (21")
Overall length	4.45m (14'7")
Overall width	2.32m (91")
Tyres	400/60-15.5 10 ply
Brakes	Hydraulic brakes plus manual parking brake
Optional Extras	Road lighting and mudguards

Can also be used as a conventional tipping trailer.

“Best item of equipment I have ever purchased. It has taken hours off topdressing and bulk material moving. Easy to use for filling Cushman topdresser, freeing up two staff members for other tasks.”

- Eliminates manual handling in line with HSE objectives
- Frees up manpower for other important jobs
- Speeds up topdressing so greens are back in play quicker
- Unique design with wheels outside of the body for maximum stability and safety
- Suitable for use with modern spinner type topdressers
- Can also be used as a conventional tipping trailer

Wheels spaced outside body width provide extra stability for high tipping.

BUNKER-DRAINER

ASK FOR
A DEMO

YOUR SOLUTION FOR FLOODED BUNKERS

The shaft driven pump quickly empties flooded bunkers, trenches or graves with no priming.

- Quickly empties flooded bunkers, trenches and graves with no priming
- 5hp Honda engine with a high volume rotary impeller pump
- Optional additional drive shaft with Vibrating Poker attachment for concreting work

One thing you can't control is the weather. If you have heavy rainfall the night before a big tournament, your bunkers could be flooded in the morning.

At times like this that you'll be glad you've got a GreenTek Bunker-Drainer in your shed.

This pump means business!

Bunker-Drainer is a highly effective self-priming submersible pump that can handle muddy water with ease. The 5hp Honda engine drives a heavy duty flexible drive shaft with a high volume rotary impeller pump to quickly empty flooded bunkers, trenches or graves with no priming.

An additional drive shaft with a Vibrating Poker attachment is also available for concreting work.

Bunker-Drainer

Engine	Engine Honda GX160 5hp
Drive shaft	5.0m
Pump	Heavy duty 2" submersible pump
Hose	10m of 2" layflat hose included

PROTECT YOUR TURF

When you are hosting events or carrying out building maintenance Turf Protection Mats can offer protection from heavy footfall, vehicle and plant access.

A wide range of different trackway systems enables GroundGuards to provide solutions for the whole spectrum of turf protection requirements, from pedestrian walkways through to heavy plant access.

The following are some of the most popular products within the range.

FastCover PLUS – these 1.2 x 0.6m mats interlock together to provide a trip-free surface, ideal for temporary walkways and marquee flooring.

MultiTrack – an extremely versatile 2.44 x 1.22m mat system, with a Roadway Tread on one side, and a Walkway Tread on the other. Extremely strong and durable, making them a great investment for golf courses and landscapers.

MaxiTrack – a heavy-duty bolt-together system for more demanding access requirements. Mats are 1.8 x 0.9m but weigh only 40kg so are easily installed by hand.

XtremeMat – these massive 4 x 2m mats provide the ultimate rigidity for supporting very heavy plant, or for making access roads for longer term projects.

Available to hire or buy, turf protection is offered by GroundGuards, part of the GreenTek Group.

XtremeMat: Create access roads for heavy plant

MaxiTrack: Heavy duty trackways for easy access

Extremely versatile for both vehicles and pedestrians

FastCoverPlus: Easy to install temporary walkways
